

Wroclaw

Information about the Company
December 2025

The Murapol Group is one of the largest and most experienced residential developers in Poland, operating in the industry for nearly 25 years.

Since 2021, the Murapol Group has also been developing operations in the complementary sector of building units for institutional rent (PRS) under the design&build formula.

A geographically diversified investment map covering 21 Polish cities, a vertically integrated business model, high standardization, a product offering in the popular and pre-

mium popular segments, an abundant land bank, as well as a two-stage land acquisition model, are the Murapol Group's main differentiators ensuring high efficiency of its projects and relevance in the market.

Since December 15, 2023, the company has been listed on the Main Market of the Warsaw Stock Exchange.

Leading position in the Polish market

The Murapol Group has been present on the residential real estate market in Poland since 2001, making it one of the most experienced residential developers in the country. From the beginning of its operations until December 31, 2025, it has completed 102 multi-phase developments, which included 485 buildings with approximately 34,800 units. In 2021, the Murapol Group established a strategic cooperation in the PRS sector (under the design&build formula) with LifeSpot, a PRS platform owned by the funds managed by the Real Estate Group at Ares Management, a leading global manager of alternative investments. In 2025, the Murapol Group entered into a five-year cooperation agreement in the PRS sector (Private Rented Sector) with PRS JV Lux S.Å R.L., a platform controlled by the Centerbridge Partners fund and Griffin Capital Partners. Murapol's investment in the PRS platform complements its core development activities, which include selling modern apartments to private clients.

Thanks to its sales and handover results, **the Murapol Group is among the top residential developers in the country year after year.** In 2020-2025, it sold a total of 20,900 units, including 4,000 to PRS and private

The Murapol Group's offering is focussed on compact 2- and 3-room apartments, with an average area of about 45 m². These units generate great enthusiasm among customers, which is reflected in the high pace of sales.

student dormitories (PBSA), and transferred 19,500 units to customers, including 2,600 to PRS.

In 2025, the Murapol Group maintained its sustainable development course, marked by stable sales and handover results to retail customers, supported by the implementation of PRS investments in the design&build formula for one of its shareholders, and expanded its cooperation in the PRS sector with PRS platform owned by funds managed by Ares Management and Griffin Capital Partners, and with PRS JV Lux S.Å R.L. - a PRS platform owned by Centerbridge Partners and

partners of Griffin Capital Partners. Numerous competitive advantages, including an established market position, a product offering aimed at a wide range of customers and a proven business model, proved effective even during the economic downturn of recent years.

Total sales to retail customers in 2025, including paid reservation agreements and after eliminating cancellations, **amounted to 3,140**. In this regard, the Company concluded **2,856 development and preliminary agreements** with retail customers and had **284 paid reservation agreements** after eliminating cancellations (as of 31/12/2025). During the same period, 2,898 units were handed over to buyers.

Absorptive segment, geographic diversification...

The Murapol Group's offer is located in **the broad and most absorptive segment of the residential real estate market, i.e. the popular (affordable) and popular premium (affordable premium)**, which, in the opinion of the Management Board, is relatively resistant to fluctuations in macroeconomic factors. It is dominated by 2- and 3-room units, with floor areas ranging from 40 to 50 sqm.

The financing structure for residential purchases at the Murapol Group is closely dependent on interest rates and the buyer's creditworthiness. During periods of high borrowing costs, as was the case in 2022 and 2024, we observed a clear predomi-

Map of Murapol Group developments (as of 31 December 2025)

- Projects completed, under construction, and in the pipeline
- New locations under consideration

nance of cash transactions. 2025 brought balance in this area – the share of mortgage loans and customers' own funds was evenly distributed, accounting for 50% of each.

The Murapol Group is also **the most geographically diversified residential developer** in Poland. Its investment map (understood as investments completed, under

construction or in the pipeline) covers 21 cities, both the largest agglomerations in Poland, including Warsaw, Krakow, Wroclaw, the Tri-City, the Silesian agglomeration, Poznan and Lodz, and smaller cities such as Bielsko-Biala, Bydgoszcz, Lublin and Torun.

Thanks to its geographic diversification, the Murapol Group reaches a wide range of customers and can benefit from the growth of not only the largest, but also local residential markets.

...and one of the largest land banks

Another competitive advantage of the Murapol Group is its **large land bank, which is systematically renewed and expanded**, and which (as of December 31, 2025) allows for the construction of about **19,600 units**.

Although the Murapol Group's development projects are usually built outside the strict city centers, they are located in **well-connected locations with access to educational and urban infrastructure, in prospective and developing neighborhoods**.

Katowice

Bielsko-Biala

The Murapol Group's land acquisition model is based on flexibility and individual tailoring

to the owner's needs. Depending on the nature of the plot and the seller's expectations, we utilize various transaction methods: from conditional or unconditional preliminary agreements, through immediate purchase "as it is," to deferred payment agreements secured by mortgages. The entire process is supported by an experienced, multi-person Acquisition Team, which integrates legal, technical, and financial analysis, ensuring smooth transaction completion and security for the property owner.

Efficient vertically integrated business model

What sets the Murapol Group apart from developers listed on the WSE is the most vertically integrated business model. It assumes **concentration within the Group of all competencies necessary for the execution of development projects**, from land acquisition, through architectural and engineering design, project budgeting, procurement of construction materials and general contracting, to marketing and sales activities. Over the years, the Murapol Group has

acquired unique know-how in design and technology solutions. BIM (Building Information Modelling) technology enables precise estimation of pre-estimates, which translates into the creation of optimal budgets for each investment and high cost control. In addition, it allows to avoid conceptual errors, determine the exact scope of work and materials needed. The Unit94 system developed by the Murapol Group, i.e. 94 standardized universal tasks for each investment, translates into precise planning and high efficiency in budgeting and selection of subcontractors.

Murapol Group's vertically integrated business model

Land acquisition	Design	Construction	Marketing and sales
• approx. 26 professionals⁽¹⁾ • Land acquisition at relatively low prices • A flexible and individual approach to negotiating every real estate transaction	• Own architectural and engineering studio of approx. 140 specialists⁽¹⁾ • Standardization of buildings to reduce costs while maintaining optimal quality	• Team of over 200 people⁽¹⁾ responsible for general contracting • Standardized process divided into 94 tasks • Our own investment quality control team	• Network including 26 sales offices • Strong sales and marketing team of approx. 140 people⁽¹⁾ • Approximately 55% of sales made through own distribution channels⁽²⁾

Warsaw

Murapol Group ensures its **high efficiency and cost control**.

The Murapol Group describes its way of operating as Plug&Play - it can effectively transfer proven solutions and standardized projects to almost any location and **effectively increase the scale of its operations**.

Strategy focused on sustainable growth

The Murapol Group's goal is sustainable growth and maintaining a strong position in the real estate development industry. It plans to **continue growing and scaling its operations in Poland**.

The Murapol Group intends to continue its strategy of geographic diversification of its operations in Poland. To this end, it is **constantly replenishing and expanding its land bank** and plans to acquire new development sites in existing cities, as well as outside the locations where it currently operates. It is considering Olsztyn, Rzeszow or Szczecin, among others.

Experienced staff

A key factor in the Murapol Group's success is the **competence and experience of its management team and the knowledge and commitment of its employees**.

The Murapol Group has built a team of over 700 professionals with the knowledge, competence and experience to manage all stages of development projects.

The management team of the Murapol Group has significant industry experience acquired in the course of many development projects in Poland, and has comprehensive knowledge and practice in such areas as coordinating the formal and legal aspects of real estate acquisition, managing investment processes, as well as financing, sales, marketing, compliance and corporate governance, or capital market operations. The Company's Supervisory Board includes partners and directors of Ares, a leading global alternative investment manager, and Griffin Capital Partners, one of the largest and rapidly growing private equity investors in Central and Eastern Europe, active in the

real estate sector. The Supervisory Board also includes three independent members. The members of the Supervisory Board have extensive industry and managerial experience.

Management Board of Murapol S.A.

Nikodem Iskra, President of the Management Board

Associated with the Murapol Group since 2007. In the first years of his work, he held the position of head of the legal department, and later, as a legal counsel, he served as its self-appointed proxy. From 2013 to 2017, he held the position of Vice President of the Management Board. In 2018, he took the chair of the Management Board, responsible for issues of strategic management of the Murapol Group and overseeing its development. Nikodem Iskra is actively involved in the processes of land acquisition, obtaining building permits, design, construction and sale of the Group's residential projects. He has extensive and comprehensive experience in legal counseling, management of the company's affairs and representation. Nikodem Iskra graduated from the Faculty of Law and Administration at the University of Silesia in Katowice with a Master of Laws degree (1997-2002). Between 2005 and 2009 he served his legal training at the Regional Chamber of Legal Advisors in Katowice, obtaining the title of legal advisor in 2009.

Przemysław Kromer, Member of the Management Board

Started working with the Murapol Group in April 2020 as Member of the Management Board and Chief Financial Officer. He oversees the economic and financial area, responsible for, among other things, financial management, liquidity and obtaining financing for the Murapol Group. Przemysław Kromer has extensive and comprehensive experience in planning and management, organizing budget processes, preparing financial documentation and working with private equity funds. Przemysław Kromer received his master's degree from the Warsaw School of Economics, where he studied Finance and Banking and Management and Marketing (1998-2003). In 2007, he obtained full membership in ACCA (The Association of Chartered Certified Accountants). In 2017, he completed a postgraduate program for international board members organized by INSEAD Executive Education.

Iwona Sroka, Member of the Management Board

She started her cooperation with the Murapol Group in 2017. In 2018, she assumed the position of Member of the Board of Directors responsible for the area of marketing and PR&IR communications. She has extensive and comprehensive business experience in management, marketing communications, capital and financial markets, as well as academic experience, as well as a member of supervisory boards. Between 2000 and 2017, she gained managerial experience at the Warsaw Stock Exchange and the National Securities Depository. Iwona Sroka graduated from the Warsaw School of Economics (1989-1994) with a master's degree, and received a doctorate in economic sciences in 1999. From 1994 to 2009, she was an assistant professor at the Warsaw School of Economics, and since 2009 she has been an assistant professor at the Faculty of Management at the University of Warsaw.
